RAISING SCRUB HOGS Does Not Pay

The Same Feed and Care Given to Purebred or Good Grade Hogs
Will Produce More Pork in Less Time

THE TWO PICTURES BELOW TELL THE STORY

George Watson received \$25.50 as payment in full for the eight razor-backs shown above. They were eighteen months old.

Wm. Maddox received \$332.93 for the eight hogs shown above on the same day and at the same market. They were seven months and one week old.

It was not the fault of the feed, for no amount would have made the Eight small hogs weigh as much as the Eight big ones. It was a case of scrub hogs and no feed compared with good hogs and plenty of feed. The difference was \$307.43

A good purebred boar used on common sows will build up a herd of grade hogs that will make profitable feeders. Every farmer should use, if not own, a purebred boar
